Embrowdery by Jule

Your desired look is difficult to achieve if your brows are naturally sparse and lack definition. Sometimes this happens as we grow older; sometimes it is simply in the genes.

Embrowdery™ (not to be confused with microblading) is a method whereby fine strokes are penetrated into the skin for a hair-like finish. The appearance is completely natural and blends with or without hair along the brow bone. It lasts for up to two years and is the perfect hassle-free way to keep your brows manicured and shaped.

We offer this service by fully trained Brow Specialists. 48 hr patch test required. Please allow two and a half hours for first treatment.

For lash Extensions you will also be asked to sign off on 'comfort' before leaving the salon. (In a small number of cases lashes can cause irritation, if this happens they should be removed to prevent you from rubbing at the eyes and potentially causing infection.)

We Deliver the Beauty of Healthy Skin™

Skin Clinic

Medical Microdermabrasion. This is suitable for all skin types and is a safe and effective way of exfoliating the skin without using any chemicals or lasers. This procedure stimulates new collagen and elastin production whilst improving fine lines and texture.

Epionce Peels have anti-bacterial and anti-inflammatory properties making them very suitable for even sensitive skin types. A series of gentle but effective peels will give long term results relieving congestion, dullness and delivering a clearer radiant complexion.

Image Peels target a full range of skin concerns from blemishes and oiliness to fine lines, wrinkles, dryness, pigmentation and more. Image doctor developed peels are fully customizable and can transform the skin in as little as one treatment. Due to the high concentration of ingredients a patch test is required for all peels.

IPL Rejuvenation produces impressive results in eliminating the ageing effects of sun damage as well as reducing facial redness by using pulses of visible white light to the face. It can be used to treat pigmentation, sun spots, broken veins, rosacea and skin elasticity.

Microneedling is an advanced non aggressive aesthetic treatment which targets pore size, fine lines, sun damage and acne scarring whilst boosting collagen levels. It creates pathways permitting the introduction of serums and growth factors into the deeper levels of the skin. This stimulates the skin to regenerate and repair itself naturally, creating smoother, brighter, healthier, younger-looking skin. You can expect your skin to look plumper, healthier and brighter within a few days with visible signs of rejuvenation and repair in 2-6 weeks.
